**RE: Application for Bachelor of mechanical engineering**

Dear Sir, Madam,

I am writing to apply for a Bachelor of Science degree program in Mechanical engineering offered by The Engineering Institute of Technology in Perth, Australia. I would like to enrol in Autumn session of 2020.

Since I was a child, I was always eager to understand, how a mechanism operates in a synchronous way to execute a particular function. Moreover, I was consistently thrilled by the challenge of disassembling a device, then reassembling it again. In fact, since my early childhood, building an engine or a robot was a both a dream and career goal. During high school, I enjoyed the idea of utilising math and physics to design practically utilized mechanisms. I was further stimulated when I began to read about hydraulics and thermodynamics system. That led me to realize that I have always wanted to study things that involve movement and coordination, in order to make practical utilization in development of various things. Therefore, choosing mechanical engineering is a decision based both on passion and on interests.

I already have an academic background in engineering because I am studying life sciences in my high school. At this point I would like to develop my career in Automation engineering or Mechatronics, because I did several high school projects related to automation. I am type of person who likes to invent and develop innovative products which are more energy efficient and environmentally sustainable, and therefore mechatronics would be an appropriate specialization for me.

I am confident that the Engineering Institute of Technology in Perth would be an excellent start of an exciting engineering career. For improving my education in engineering and preparing to start a career with confidence, Engineering Institute of Technology in Perth is the most appropriate choice for me. Moreover, your institution has a good ranking which makes it even more attractive as a choice for undergraduate studies. Insomuch I am amazed by the facilities and I believe in you and your program.

I consider myself to be a good candidate because of my thirst for knowledge. I also have a flexible and tolerant personality and can easily adapt to any environment. I believe that I should follow my dream while I am still young because now, I believe I can achieve anything. Thus, I am quite sure that I would like to apply for Engineering Institute of Technology in Perth program in order to achieve my goals. I do well under pressure but motivating environment can stimulate me to perform even better.

In conclusion, I would like to reconfirm that I am eager to gain new experiences, improve my skills and Broaden my understanding of the dynamic engineering world.

Thank you very much for considering my application.

Yours faithfully,

Marc Johnson
